

Press Release

CAREL AT RHVAC 2017 (BANGKOK) BRINGS THE FUTURE OF HIGH EFFICIENCY IN HVAC/R

Brugine (Padova), 23 August 2017 - CAREL will be exhibiting at RHVAC 2017, Bitek Bangna Bangkok, from September 7th through 9th 2017, **booth F32-G31 Hall EH98**, where it will show high efficiency solutions for HVAC/R applications.

Among the solutions on show at RHVAC there will be **HEOS Sistema**, the most technologically advanced, high-efficiency solution for the management of refrigerated showcases for the food retail industry. The classic architecture of a supermarket refrigeration system can be replaced by the CAREL HEOS Sistema featuring remote showcases fitted with variable-speed BLDC compressors cooled by a water loop. CAREL's booth will feature a working simulator of this technology.

At CAREL's booth there will be **electronic expansion valves and DC inverters**: CAREL's products for high-efficiency applications in the HVAC/R sector. RHVAC represents the opportunity to highlight the benefits of the "heart" of CAREL's solutions for energy saving and high reliability.

CAREL will also be presenting its completely upgraded solution for the control and management of beverage coolers: **Heez**, compact and technologically-advanced solution that guarantees high energy efficiency and incredible performance while reducing environmental impact. Heez incorporates an electronic controller and rotary DC inverter technology in the same system, ensuring highly stable beverage temperature control and guaranteeing energy savings, higher reliability, lower noise and more compact dimensions.

RHVAC visitors will also see the **entire c.pCO range of controllers** which has received **BACnet® B-BC certification**, confirming the reliability of the communication protocols used by CAREL. Certified use of the BACnet® protocol ensures perfect interoperability between equipment and control devices for BMS systems made by different manufacturers.

RHVAC 2017 September 7-9
Bitek Bangna Bangkok
Hall EH98, booth F32-G31

About CAREL

CAREL is one of the world leaders in control solutions for air-conditioning, refrigeration and heating, and systems for humidification and evaporative cooling. Our products are designed to bring energy savings and reduce the environmental impact of equipment and systems. Our solutions are used in commercial, industrial and residential applications. CAREL has 20 fully-owned subsidiaries and 7 production sites, as well as partners and distributors in a further 75 countries.
